L&N KITCHEN

Proposal for Digital Ordering & Waiter System Upgrade

Seamless guest ordering · waiter floor workflow · live tracking · digital receipts

Prepared for L&N Kitchen leadership · August 2026

Executive summary

Elevate dining and operational efficiency with an end-to-end digital workflow

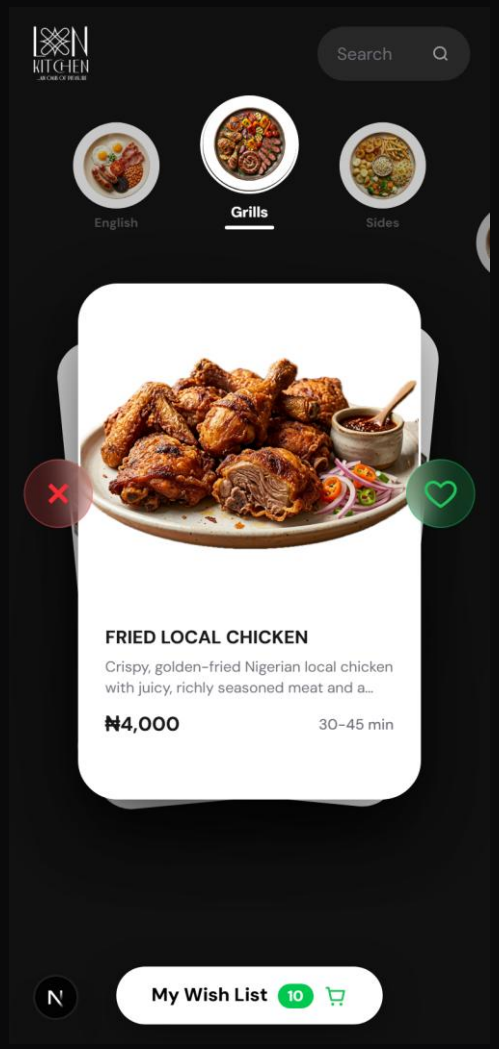

- Current menu at menu.landnkitchen.com is a static catalog browse, cart, and manual staff coordination.
- The upgraded platform is a real-time, interactive workflow already previewable today.
- Bridges customer convenience and staff efficiency across every touchpoint.
- From mobile swipe browsing and wishlist QR sharing → waiter assignment → kitchen tracking → paid receipt.
- Goal: fewer order mistakes, faster table turns, and a user-friendly experience guests remember.

Core platform pillars before & after

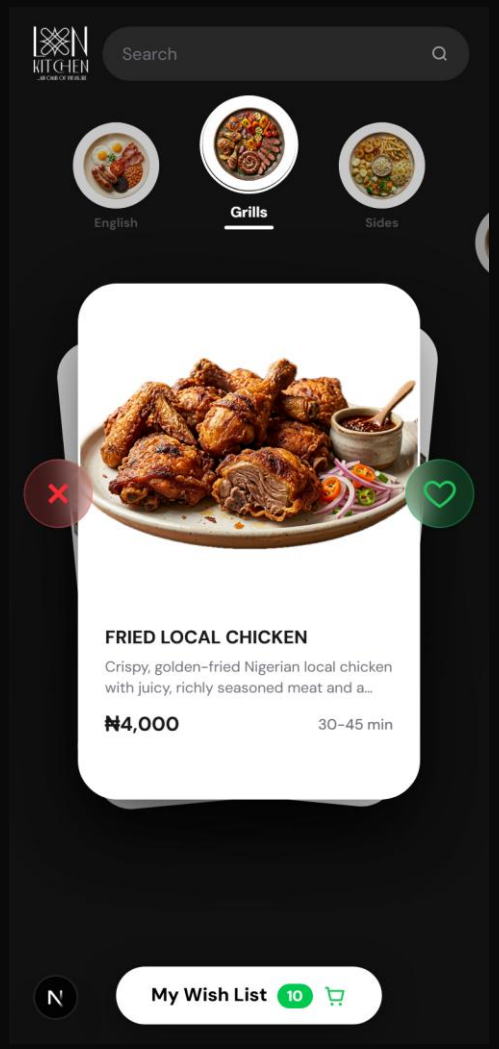

Feature area	Current	Upgraded
Customer experience	Static catalog browsing with manual cart actions.	Mobile swipe deck, wishlist, search, dish detail, order history & QR sharing.
Ordering mechanism	Manual, uncoordinated staff messaging.	Guest QR scanned by waiter for instant floor sync to admin.
Order management	No live status after placement.	Real-time lifecycle: New → Accepted → Paid → Completed.
Staff workflow	No dedicated waiter assignment.	Staff ID login, table tagging, one-shot assign to kitchen.
Live sync & protection	No sync after order starts.	database realtime + locked-item rules protect guest selections.

1 · Seamless customer mobile experience

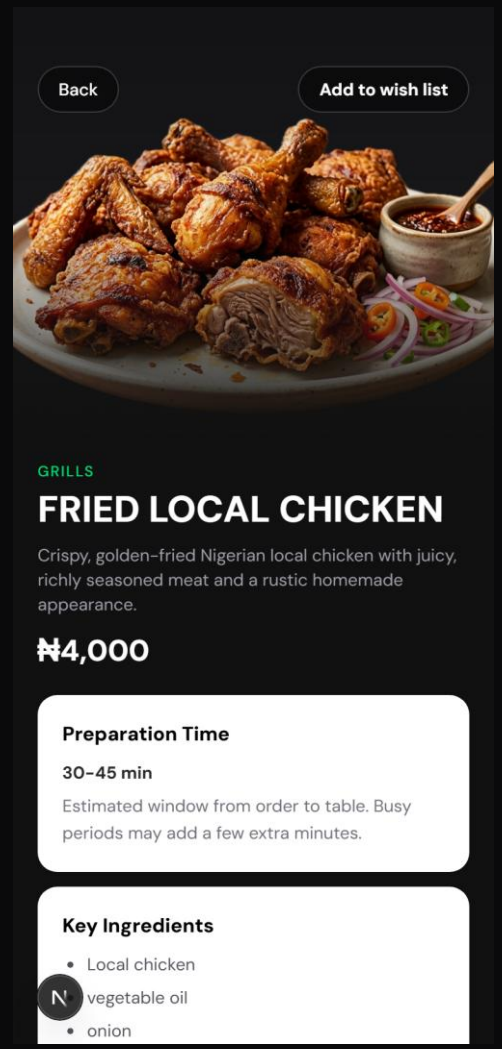

Fast, touch-friendly UI scan QR at the table and start browsing instantly

Swipe menu

Search dishes

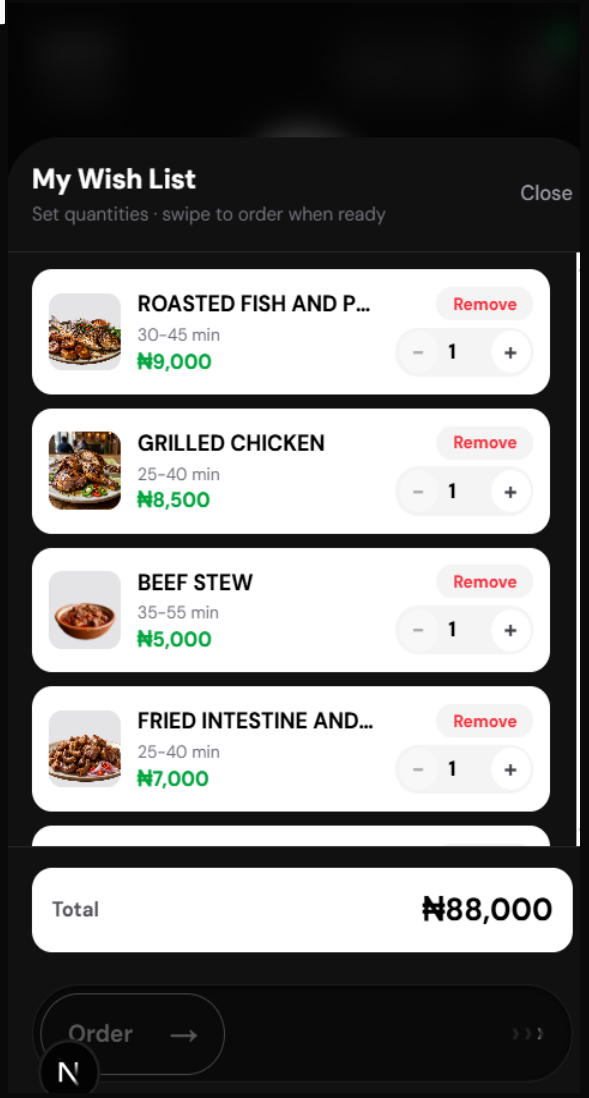

Dish detail

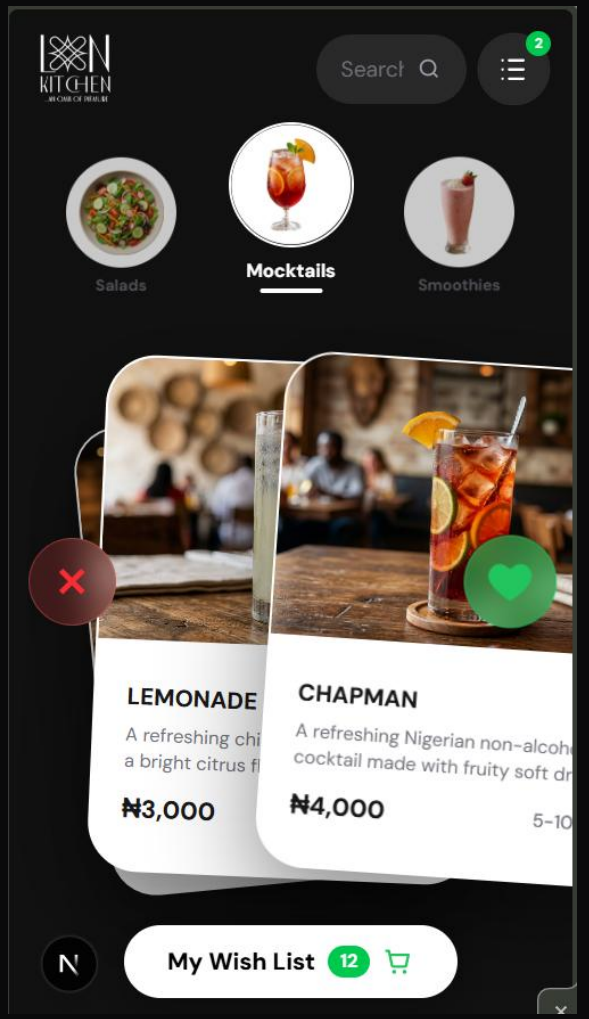

Guest ordering simple, no signup required

What guests do

Swipe right to wishlist · left to skip guided onboarding on first visit
Build a wishlist session without creating an account
View pricing (₦), ingredients, allergens, prep time & calories
Place order → receive shareable QR for the waiter
Order more items or start a new order; full order history on device
Live updates when staff accept or adjust the order
Digital order summary + QR receipt after submission

Wishlist ready

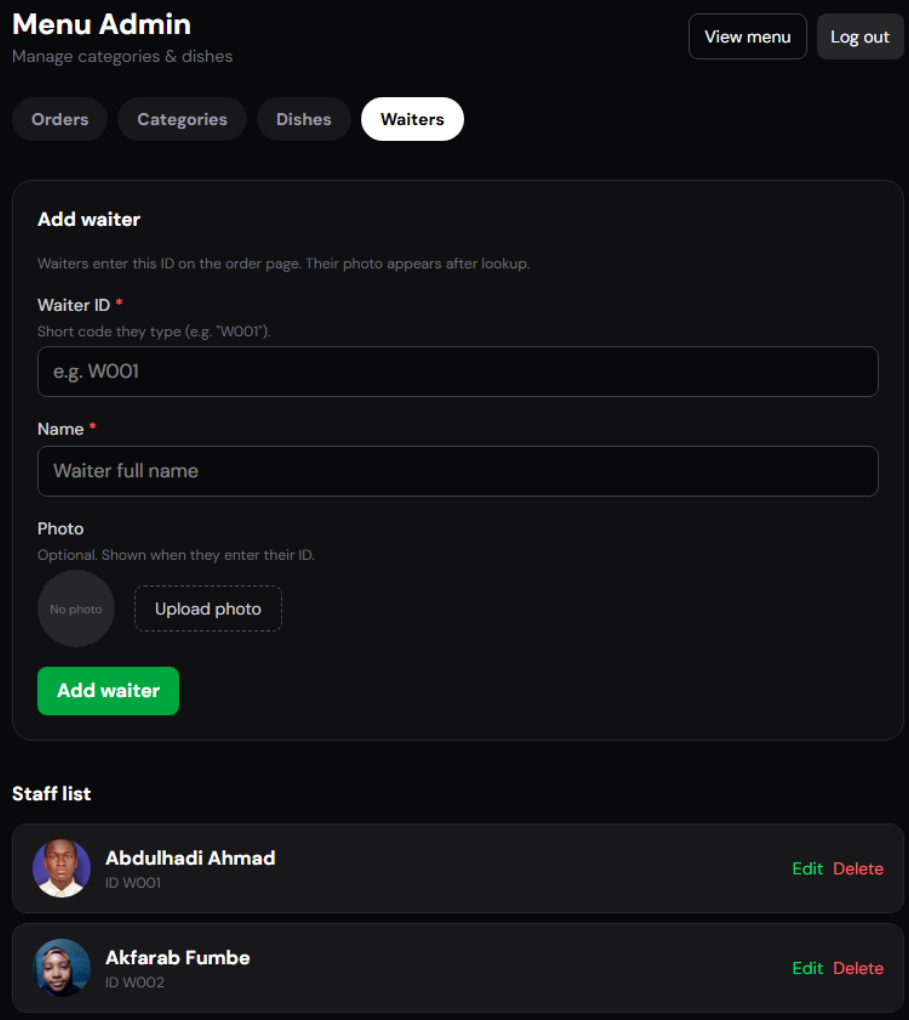

Swipe to add

2 · Waiter order taking & assignment

Dedicated /order interface Staff ID, QR scan, table capture

Floor workflow

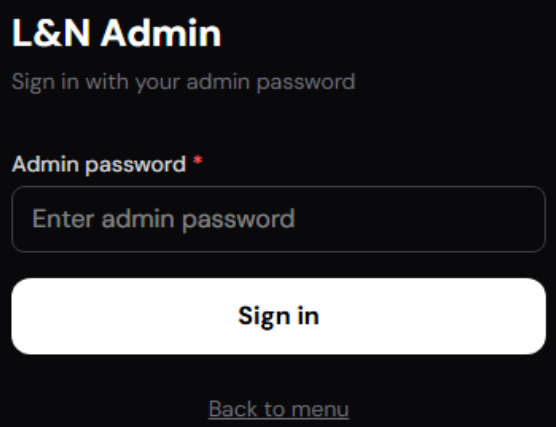

- Waiter opens /order and enters Staff ID (photo + name lookup)
- Scan guest wishlist QR directly from the customer's phone
- Order populates instantly no re-typing dishes
- Capture table number or lounge area
- Add items, change quantities, note special requests table-side
- Assign to admin once locked after first assign to prevent errors
- Download order image for kitchen pass if needed

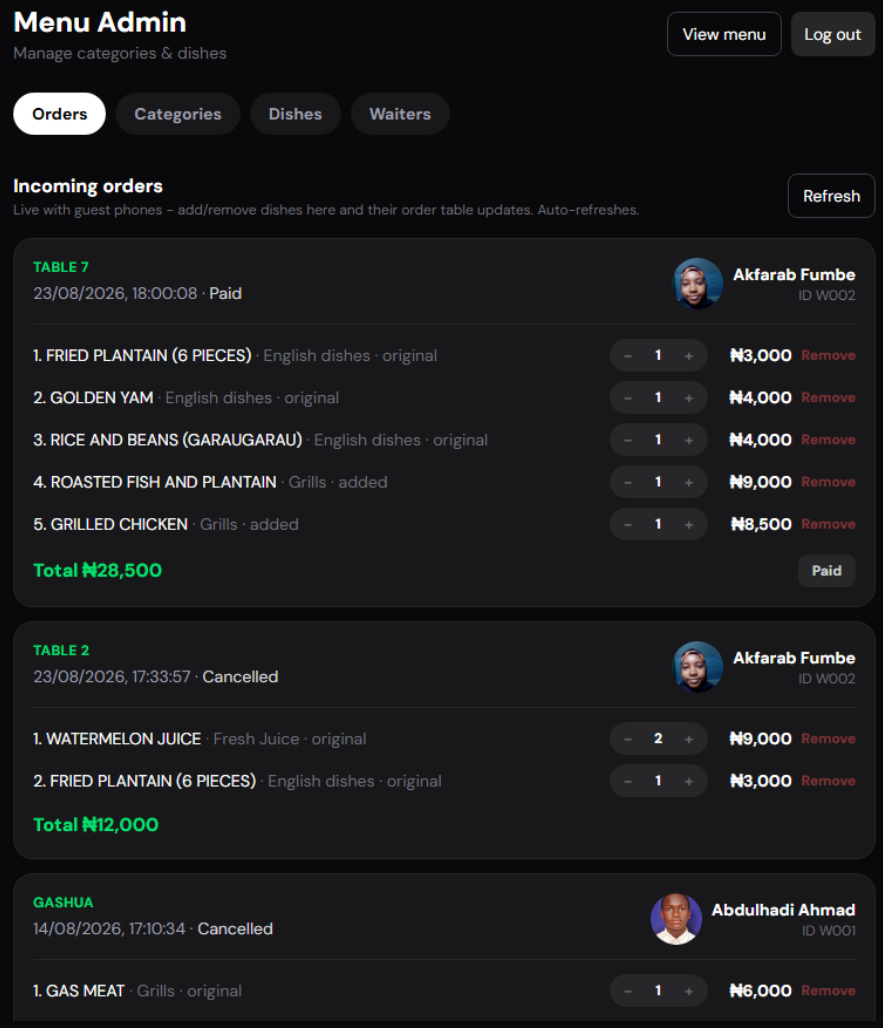

Waiter profiles in admin

3 · Real-time order tracking & management

Central admin command center live status, locked items, mark paid

Secure admin login

Live orders dashboard

Live order lifecycle

Every guest order moves through clear, trackable statuses

New

Guest wishlist submitted via QR sync

Accepted

Waiter / kitchen confirms order

Paid

Settlement recorded; guest session resets

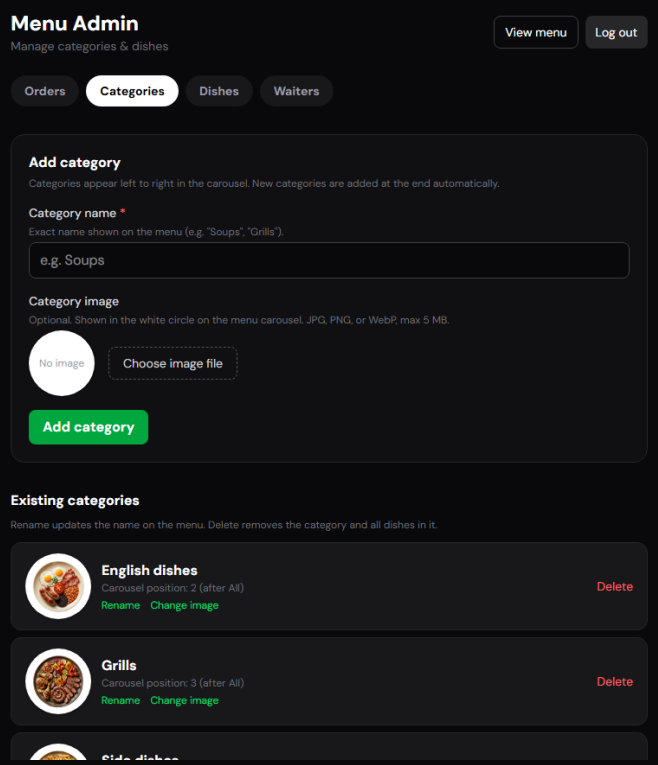

Completed

Order fulfilled; metrics updated

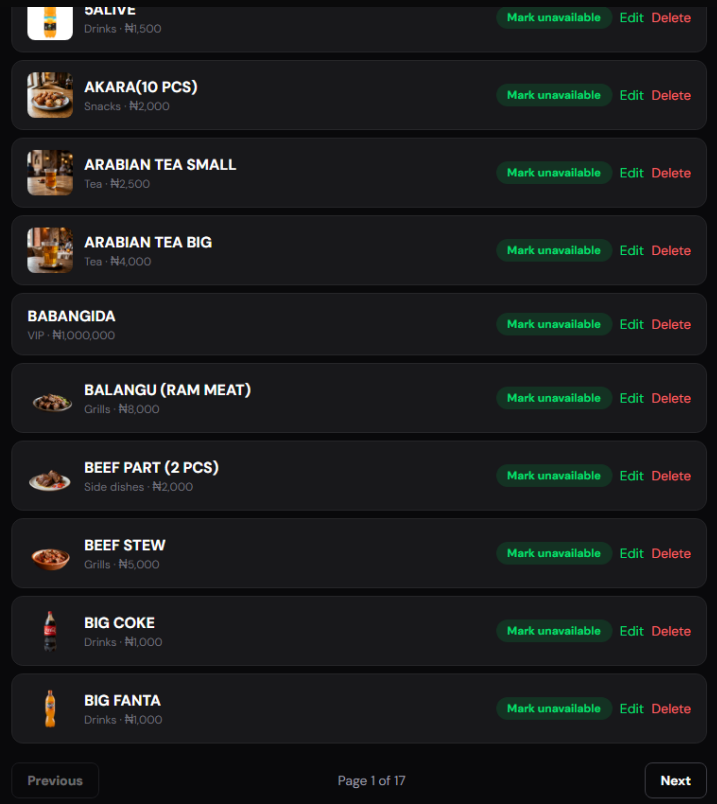

- Locked items: original guest picks are preserved staff can add but guests cannot remove locked lines
- Admin can accept, mark paid, cancel, adjust quantities, and add dishes from the live menu
- When marked paid, guest session resets cleanly for the next round of ordering
- Every change syncs back to the guest phone via database order-shares

4 · Menu & inventory control

Instant availability toggles · dynamic CRUD · cloud image storage

Categories

Dishes CMS

Staff controls

- Hide out-of-stock items in one tap
- Add / edit categories & dishes
- Upload hi-res images to database Storage
- Manage waiter Staff IDs & photos
- Search, filter, paginate dish list
- Role-ready for future kitchen display

User-friendly experience upgrades

Designed for real guests and busy floor staff

Guided onboarding

Search spotlight walkthrough
Swipe tutorial on first visit
Skips automatically once guest has ordered

Order clarity

My Orders history with QR per visit
Order more vs new order buttons
Clear locked-item messaging

Staff speed

One-scan QR handoff
No duplicate assign
Visual status badges on every order

Receipt & proof

Centered order summary QR
Share ID for waiter lookup
Paid status closes the loop

Who uses what — website access

Simple URLs for guests, floor staff, and management

Guest menu

https://landnkitchen/

Scan table QR on phone
Swipe, search, build wishlist
Share session QR with waiter
Track order + digital receipt

Waiter /order

https://landnkitchen. /order

Enter Staff ID
Scan guest wishlist QR
Capture table / lounge
Assign to admin (one-shot)

Admin /admin

https://landnkitchen/admin

Secure password login
Live orders dashboard
Accept · Mark paid · Cancel
Menu, categories, waiters CMS

System architecture & tech stack

Frontend

Next.js App Router + Tailwind CSS for fast, mobile-first, desktop preview frame

Database

Supabase PostgreSQL for orders, dishes, categories, waiters

Realtime & storage

Supabase Realtime + Buckets (menu-images, order-shares)

Security

HMAC-signed admin session cookie (ln_admin_session) · encrypted staff auth

Deploy

Vercel edge hosting for instant QR-ready public URL

Investment ₦1,850,000

Fixed package covering guest UX, waiter workflow, admin ops, and launch support

Workstream	Amount (NGN)	Share
Guest ordering UX (swipe, wishlist, QR, onboarding, receipts)	₦380,000	21%
Waiter /order flow (Staff ID, scan, assign, table capture)	₦320,000	17%
Admin live orders, lifecycle, locked items & sync	₦420,000	23%
Menu & waiter CMS + database storage integration	₦280,000	15%
QA, floor pilot, staff training & 30-day support	₦250,000	14%
Contingency & deployment buffer	₦200,000	10%
TOTAL PACKAGE	**₦1,850,000**	

Expected business outcomes

Seamless guest orders

QR → wishlist → waiter scan no verbal back-and-forth or order slips

Faster table service

Waiters spend seconds, not minutes, capturing an order

Fewer kitchen errors

Locked guest items + live admin edits = one source of truth

Clear payment loop

Mark paid resets guest session; totals always match admin

Happier staff

Simple Staff ID login and visual order board

Operational insight

Status history, bestsellers, and peak-hour visibility

L&N KITCHEN

From swipe to served
a digital workflow guests and staff will love.
